

Dex Performance

NEW .. Solid State Drives for amazing responsiveness

Power on and ready to use in Windows in 20 - 30 seconds

Applications start virtually instantly

No moving parts, fast quiet and reliable

SSD's - Solid State Drives make traditional Hard drives look like dinosaurs!!

Traditional Hard Drives run on mechanical moving parts.
Even the best systems have inherent lag from this aging technology.
SSD's are pure memory chip storage, they have no lag and then run 3x as fast.

They make any system remarkably snappy, you click they go and go FAST

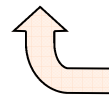

The compromise is size, but 120gb is generally plenty for an average user.
If you need extra then add a regular hard drive as well.

Extra features - Deluxe mainboard, USB3 ports, HDMI Video, Card reader

Tower Pricing	<i>i3</i>	<i>i5</i>	<i>i7</i>
CPU	Intel Core i3 2100	Intel Core i5 2500K	Intel Core i7 2600K
